First Web Page

HTML is a series of tags on a web page that format the display.

1. Create a `FirstWebPage.html` file with Notepad or another Editor and open it in your browser to see the webpage

<html>: tag tells the browser that this is an HTML document.

<title>: tag it defines the title of the document.

<body>: tag defines the document's body.

```
<!DOCTYPE HTML>
<html>
<head>
  <title> First Web Page </title>
</head>
<body>
  A good start is half successful
</body>
</html>
```

<div> CSS Box

1. Create a **Box.html** file and open it in your browser to see the webpage

<div>: html tag defines a division or a section in an HTML document.

<style>: setting the style of an HTML element.

border: CSS properties allow you to specify the style, width, and color of an element's border.

Color: (red:#ff0000 , green:#00ff00 , blue:#0000ff

, grey:#cccccc)

text-align: CSS properties specifies the horizontal alignment of text (left, center, right)

```
<!DOCTYPE HTML>
<html>
<head>
<title> Border </title>
  <style>
    .box{
      border:1px solid
#cccccc;
      width:300px;
      height:150px;
      text-align:center;
    }
  </style>
</head>
<body>
  <div class ="box" >
```

```

    Better Life
</div>
</body>
</html>

```

2. defines the radius of the div's corners.

border-radius: CSS3 property defines the radius of the element's corners.

```
<style>
  .box{
    border:1px solid #cccccc;
    width:300px;
    height:150px;
    text-align:center;
    border-radius:25px;
  }
</style>

<div class="box" >
  Better Life
</div>
```

3. defines the shadows of the div's box.

box-shadow: CSS3 property attaches one or more shadows to an element.

```
<style>
  .box{
    border:1px solid #cccccc;
    width:200px;
    height:200px;
    text-align:center;
    border-radius:25px;
    box-shadow: 0px 0px 5px #888888;
  }
</style>

<div class ="box" >
  Better Life
</div>
```

4. defines the shadows of the div's box.

box-shadow: CSS3 property attaches one or more shadows to an element.

h-offset: The horizontal offset of the shadow.

v-offset: The vertical offset of the shadow.

```
<style>
  .box{
    border:1px solid #cccccc;
    width:200px;
    height:200px;
    text-align:center;
    border-radius:25px;
    box-shadow: 10px 10px 5px #888888;
  }
</style>

<div class ="box" >
  Better Life
</div>
```

5. defines the background color of the div's box.

background-color: CSS property define the color of background.
font-size:24px; CSS property define the size of font.
color:#ffffff; CSS property define the color of font.

```
<style>
  .box{
    border:1px solid #cccccc;
    width:200px;
    height:200px;
    text-align:center;
    border-radius:8px;
    background-color:#ff0000;
    font-size:24px;
    color:#ffffff;
  }
</style>

<div class ="box" >
  Better Life
</div>
```

6. defines the **absolute position** of the div's box.

position:absolute; the element is positioned absolutely to its first positioned parent.

top: offset; CSS property defines the top position of an element.

```
<style>
  .redBox{
    border:1px solid #cccccc;
    width:100px;
    height:100px;
    border-radius:8px;
    background-color:#ff0000;
    position:absolute;
    top:0px;
    left:0px;
  }
  .greenBox{
    border:1px solid #cccccc;
    width:100px;
    height:100px;
    border-radius:8px;
    background-color:#00ff00;
    position:absolute;
    top:10px;
    left:10px;
  }
}
```

```
.blueBox{  
  border:1px solid #cccccc;  
  width:100px;  
  height:100px;  
  border-radius:8px;  
  background-color:#0000ff;  
  position:absolute;  
  top:20px;  
  left:20px;  
}  
</style>  
<div class ="redBox" >  
</div>  
<div class ="greenBox" >  
</div>  
<div class ="blueBox" >  
</div>
```

7. defines the **relative position** of the div's box.

position:relative; the element is positioned relative to its normal position.

```
<style>
  .redBox{
    border:1px solid #cccccc;
    width:100px;
    height:100px;
    border-radius:8px;
    background-color:#ff0000;
    position:relative;
  }
  .greenBox{
    border:1px solid #cccccc;
    width:100px;
    height:100px;
    border-radius:8px;
    background-color:#00ff00;
    position:relative;
  }
  .blueBox{
```

```
border:1px solid #cccccc;  
width:100px;  
height:100px;  
border-radius:8px;  
background-color:#0000ff;  
position:relative;  
}  
</style>  
<div class="redBox" >  
  
</div>  
<div class="greenBox" >  
  
</div>  
<div class="blueBox" >  
  
</div>
```

  .box{
    border:1px solid #cccccc;
    width:300px;
    border-radius:8px;
    padding:15px 15px 15px 15px;
  }
```

```
</style>
```

```
<div class ="box" >
```

Love is patient, love is kind. It does not envy, it does not boast, it is not proud. It is not rude, it is not self-seeking, it is not easily angered, it keeps no record of wrongs. Love does not delight in evil but rejoices with the truth. It always protects, always trusts, always hopes, always perseveres.

```
</div>
```

10. defines the space between two inline elements, inside of the div's box.
